SUMMARY

I am a ReactJS Developer at Celebal Technologies, with hands-on experience in building scalable and user-friendly web applications. I have a strong understanding of the MERN stack (MongoDB, Express.js, React.js, Node.js) and FastAPI for backend development. I have up to 2 years of experience in Software Development.

PROJECT EXPERIENCES

Project Role: AI Powered Video Analysis |CT Vision

- Worked as a ReactJS Frontend Developer in a collaborative team environment to build an AI-based video analysis platform.
- Designed and developed the UI using ReactJS, integrating interactive charts (D3.js) and canvas-based visualizations for user interaction.
- Implemented a custom drawing feature on the canvas to capture line coordinates and send them to the backend for processing image and video cut-parts.
- Collaborated with the backend team who used AI models to analyze live video feeds and detect faces; dynamically displayed face-based overlays and bounding boxes on the UI.
- Ensured a seamless frontend-backend integration and optimized rendering performance for real-time updates.

Project Role: AIBased Recruitment Dashboard |MIRAL

- Built the HR workflow for an AI-driven recruitment platform using ReactJS.
- Enabled HRs to register jobs, visible instantly on the candidate portal, and integrated AI-based resume screening and test results.
- Designed dynamic dashboards for recruiters to view and filter candidate data based on AI-evaluated skills, experience, and test performance.
- Implemented real-time notifications for candidate selection updates using WebSockets.
- Integrated REST APIs to fetch, update, and manage candidate and recruiter data efficiently.
- Added advanced search and filtering options for job listings and candidate profiles.
- Used Azure DevOps for version control, CI/CD deployment, and environment management.
- Ensured responsive and accessible UI for both HR and candidate portals, improving usability and p
